

Brockton CE School

Church Preen School

Wistanstow CE School

This plan outlines how we will manage single cases, clusters and outbreaks of COVID-19 in all three of The Edge Federation Schools – Brockton, Church Preen and Wistanstow. It also provides detail on how we plan to operate if we are required to reintroduce measures/mitigations in our setting or area to prevent transmission of COVID-19 in the context of an outbreak or cluster. This includes how we would ensure that every child, pupil or student receives the quantity and quality of education and care to which they are normally entitled.

An 'outbreak' is where **two or more** test confirmed (PCR+ve) cases of COVID-19 occur that are associated with an education setting with illness onset dates within 14 days and one of the following:

- Identified direct exposure between at least two of the test-confirmed cases in that setting during the infectious period of one of the cases.
- No sustained local community transmission & the absence of an alternative source of infection outside the setting for the initially identified case.

Further guidance on current definitions of "outbreak" and "cluster" is available [here](#). An '**incident**' has a broader meaning and refers to events or situations which warrant investigation to determine if corrective action or specific management is needed.

Outbreaks can differ significantly in terms of numbers of cases and locations of cases within an education setting. We will continue to report any cases to Public Health in Shropshire Council so that they can provide us with assistance in risk assessing when we have reached the threshold for initiating targeted interventions as described in the [Contingency Framework: education & childcare settings](#) & Shropshire Council's current SOP for schools and early year settings.

In the case of a local outbreak we will work with Shropshire Local Authority Public Health and Public Health England Health Protection Teams. Below sets out all the possible measures/mitigations that will be considered in the case of a local outbreak. The actual measures implemented will be determined jointly and based on the specific situation. They will also balance carefully the impact on the delivery of education with the need to minimise transmission. Most importantly any measures will only ever be considered for the shortest time possible, to allow the outbreak to be managed and minimise transmission of COVID-19. In all cases measures / mitigations will only be implemented to prevent larger scale school closure.

Preventing school transmission

Our refreshed risk assessments include how to promote COVID-19 vaccination uptake, effective hand hygiene, cleanliness of the environment and improving ventilation where possible.

Reporting cases and when trigger thresholds have been met

We will continue to report all cases to Shropshire Public Health per current SOP for management of cases, clusters and outbreaks in education & early years settings and will work with their health protection team to risk assess when the thresholds described in the Contingency Framework should initiate targeted interventions. We will also receive notification of positive cases from the health protection team and keep records of confirmed cases connected to school. We will attend and contribute to incident management meetings with Shropshire Local Authority and PHE when required.

Response to positive cases

Pupils and staff who have mixed closely with positive cases will be asked to have a PCR test in addition to the routine twice weekly LFD testing which has been requested. Examples of what is currently considered as mixing closely can be found in the annex of the [Contingency Framework: education & childcare settings](#). Staff contacts will be identified and will isolate for 10 full days following their last contact with the confirmed case if they do not meet the current guidelines for self-isolation exemption.

Reintroduction of consistent groups ‘bubbles’

It may become necessary to reintroduce ‘bubbles’ for a temporary period, to reduce mixing between groups should guidance from Shropshire Council / PHE require this.

Reintroduction of face coverings

Consideration will be given to whether face coverings should temporarily be worn in communal areas or classrooms (by pupils in secondary settings only), by staff and visitors in all school settings (unless exempt).

The use of face coverings may have an impact on those who rely on visual signals for communication. Those who communicate with or provide support to those who do, are exempt from any recommendation to wear face coverings in education and childcare settings.

No pupil or student will be denied education on the grounds of whether they are, or are not, wearing a face covering.

Reasonable adjustments will be made for disabled pupils to support them to access education successfully. Where appropriate, school will discuss with pupils and parents the types of reasonable adjustments that are being considered to support an individual.

Reintroduction of testing/Additional PCR testing

Consideration will be given as to whether the reintroduction of onsite asymptomatic LFT testing (secondary settings) or increased use of home testing by staff, and pupils is necessary. *We will also continue with our local recommendation that all pupils in early years and primary settings are requested to undertake take twice weekly asymptomatic testing.*

Where these measures are necessary, it will be important to work jointly with Shropshire Council and PHE to identify any support required (e.g. supply of additional tests). Where onsite testing is reintroduced, we will look to do this in a way that does not negatively impact on the education for pupils.

There may also be occasions where a mobile symptomatic testing unit/service is made available on the school site and pupils are invited to take a PCR test, or additional PCR tests may be organised through other means.

Contact tracing / isolating

From the 14th December 2022 the following directive is in place:

From Tuesday 14 December, a new national approach to daily testing for contacts of COVID-19 is being introduced (including until the end of this term). All adults who are fully vaccinated and children aged 5 to 18 years and 6 months, identified as a contact of someone with COVID-19 – whether Omicron or not – should take a lateral flow device (LFD) test every day for 7 days instead of self-isolating. Daily testing by close contacts will help to slow the spread of COVID-19.

It may be necessary for us to provide additional records of confirmed cases and their contacts during an outbreak to allow the Local Authority Public Health Team to help us manage an outbreak.

Other restrictions

We may need to limit activities that require bringing parents and carers onto site (other than for drop off and pick up) e.g. open days, performances, open evenings. We may also reintroduce staggered start and finish times if not already in operation to minimise the number of people on the school site at the start and finish of the day. We will keep under review any activities bringing pupils together in addition to the normal school day, or that required transportation for larger numbers of pupils (e.g. school trips / holidays - including residential educational visits). This could also include any activities bringing together pupils from a few different schools (e.g. transition/taster days).

Clinically Extremely Vulnerable

Shielding is currently paused. In the event of a major outbreak or variant of concern that poses a significant risk to individuals on the shielded patient list (SPL), ministers can agree to reintroduce shielding. Shielding would be considered in addition to other measures to address the residual risk to people on the SPL, once the wider interventions are considered. Shielding can only be reintroduced by national government.

In the event of a reintroduction of shielding we would need to review staffing capacity to ensure we could continue to operate staffing in a safe manner. Any attendance reductions as a result of this would be in line with the principles below.

Attendance Restrictions

As a last resort, we may need to introduce attendance restrictions. We will provide high-quality remote education for all pupils not able to attend.

Where attendance restrictions are necessary there will be an order of priority applied in terms of which pupils would continue to attend on-site provision. The only deviation to this will be where they are required to isolate (either as a result of testing positive or as a result of a local reintroduction of close contact isolation – see above).

Priority for onsite attendance will always be given to vulnerable children and young people and children of critical workers.

In exceptional circumstances, ([special schools and alternative provision only](#)) if usual interventions and provision at adequate staffing ratios, or using staff with vital specialist training cannot be provided, we will seek to resume as close as possible to the specified provision for the child or young person as soon as possible.

In out-of-school settings/wraparound childcare where attendance restrictions are in place, vulnerable children and young people will continue to be allowed to attend. For all other children, face-to-face provision will be provided for a limited set of essential purposes, such as going to or seeking work, attendance at a medical appointment, or to undertake education and training.

Where attendance restrictions are needed, we will be vigilant and responsive to all safeguarding threats with the aim of keeping vulnerable children and young people safe, particularly as more children and young people will be learning remotely.

If we must temporarily stop onsite provision on public health advice, we will discuss any alternative arrangements necessary for vulnerable children and young people with the local authority. Where vulnerable children and young people are absent or do not take up a place offered to them, we will:

- follow up with the parent or carer, working with the local authority and social worker (where applicable), to explore the reason for absence and discuss their concerns
- encourage the child or young person to attend educational provision, working with the local authority and social worker (where applicable), particularly where the social worker and the Virtual School Head (where applicable) agrees that the child or young person's attendance would be appropriate
- focus the discussions on the welfare of the child or young person and ensuring that the child or young person is able to access appropriate education and support while they are at home
- have in place procedures to maintain contact, ensure they can access remote education support, as required, and regularly check if they are doing so

Staffing Capacity

Where staffing capacity (following use of available supply teaching capacity) is impacting on our ability to open fully we will follow the principles outlined in the attendance restrictions above.

Free School Meal provision

We will continue to provide free school meals support in the form of lunch vouchers for pupils who are eligible for benefits related free school meals and who are not attending school because they:

- are self-isolating
- have had symptoms or a positive test result themselves
